## **Cambridge Technologies Announces Canadian Approval**

WORTHINGTON, MN – Cambridge Technologies is excited to announce that the company is now approved to manufacture and distribute autogenous vaccines to veterinarians in Canada.

Based in Worthington, MN, Cambridge Technologies manufactures vaccines backed by the Precision Vaccinology combination of innovative diagnostics and formulation/manufacturing. This is their first international license.

“We are excited and honored to be able to partner with leading veterinarians in Canada to provide customized vaccines,” said Jon Mahlberg, COO. “It is our hope that we can continue to grow our presence in serving the country’s swine, beef, and dairy industries with science-based solutions to challenging health issues.”

Canadian veterinarians who are interested in creating an autogenous vaccine with Cambridge Technologies should contact the company’s Customer Service team at (877) 298-1321 or via email at [info@cambridgetechnologies.com](mailto:info@cambridgetechnologies.com).
